(colour)

## O M P R O J E K T E T

**Tusen varv är ett projekt** som föddes när jag skulle lära mig att svarva i trä. I denna process upptäckte jag att det fanns ett behov av att kontextualisera för att möjliggöra kritik. Både svarvade objekt och massproduktion förtjänar att diskuteras. Därför bestämde jag mig för att svarva pinnar till en pinnstol. Pinnstolen har varit vanligt förekommande och älskad i svenska hem sedan mitten av 1800-talet och är ett tydligt exempel på en produkt som har gått från manuell till industriell tillverkning.

**Min designfilosofi** är att på ett lekfullt och kreativt sätt vara med och utveckla pinnstolen. *Tusen varv* är ett koncept som

rör sig i gränslandet mellan hantverk och industri. Sitsen och benen på stolarna görs industriellt men pinnarna i ryggen görs manuellt. Målet är att erbjuda dig som konsument en unik möjlighet att tillsammans med mig designa personliga stolar som varar hela livet.

### **Varför Tusen varv?**

**Tusen varv** står för de många varv svarven har och kommer snurra i arbetet med pinnarna. Att visualisera tusen av någonting tycker jag är svårt. Därför betyder tusen i den här sammanhanget "ofattbart många". Tusen varv - ofattbart många varv.

## ( a b o u t t h e p r o j e c t )

**A Thousand Turns is a project** birthed and departed from the process of learning wood turning. In this learning process, it was discovered that there was a need to contextualise to enable criticism. Objects created in the lathe and mass production deserve a discussion. The obvious choice for me was therefore to create spindles for the Windsor chair. A common and loved chair in the Swedish home since the middle of the 19th century and a clear example of a product that once was manually manufactured and today is being mass produced.

**My design philosophy** is to evolve and create the Windsor chair in a playful and

creative way. *A Thousand Turns* is a concept that exists in the borderland between craft and industry. The seat and legs of the chairs are made industrially, but the sticks are made manually. My goal is to offer the consumers a unique opportunity to design a personal chair that will last a lifetime.

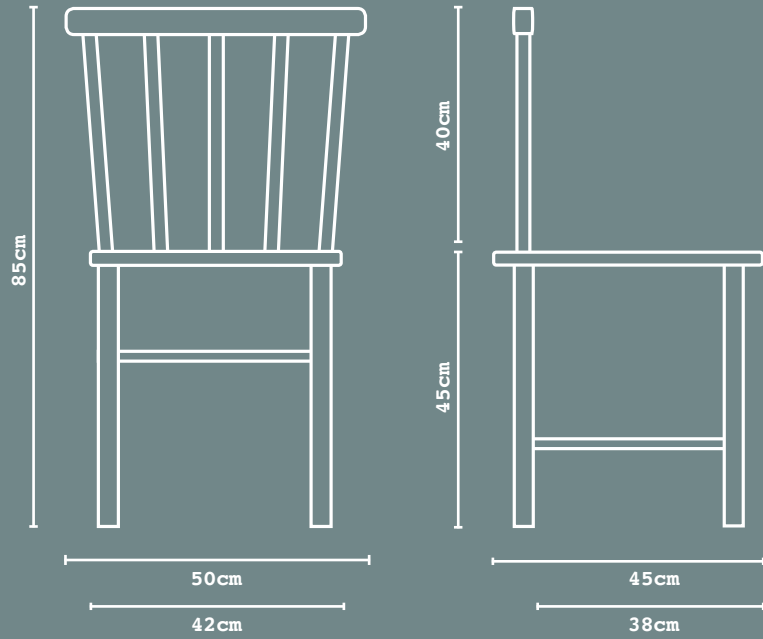

### **Why A Thousand Turns?**

**A Thousand Turns** stands for the many rotations the lathe spins while making the spindle. I find it very difficult to imagine a thousand of anything. Therefore, in this context, a thousand stands for "unimaginably many". A thousand turns - unimaginably many turns.
